Professional Summary

Technical Builder and Commercial Operator with 4 years experience bridging software engineering, automation, and business growth. Co led a startup agency for 3 years, owning the entire revenue pipeline from cold outreach and lead generation to end to end project delivery with 98% satisfaction. Wrapped up a 1 Year Placement at Thrive Learning where I built production ready tools that automate operational bottlenecks, including internal systems that reduce contract approval cycles by 70%. I focus on high agency growth, using technical depth to unblock procurement and scale revenue in GTM, Customer Success, and Customer Engineering environments.

Technical Skills and Core Competencies

Ops & Strategy: Founder Associate workflows, Revenue Operations (RevOps), Customer Lifecycle Management, Lead Generation, Sales Enablement, Client Strategy, CRM Architecture, GTM Automation Workflows, Retention and Churn Optimization.
Technical Builder: TypeScript, Next.js 15, Supabase (PostgreSQL), Claude API, Claude Code, Cursor (Cursor SDK Development), Devin, Codex, Lovable, Replit, n8n, Automation Workflows, Agentic Frameworks (Claude-Harness), API Integrations, RAG Architecture.
Compliance & Risk: ISO 27001, ISO 9001, SOC 2, GDPR, Third Party Risk Management, Vendor Risk Intelligence, RFI and RFQ Ownership, Audit Readiness.
Platforms: Vanta, Cakewalk, Jira, Pulseway, Kandji, Render, Vercel, Tailwind CSS, Notion based CRM Architecture, HubSpot, Salesforce.

Professional Experience

Co Founder and Commercial Lead - Nexique Design Labs, Pakistan
September 2021 - August 2024

- Owned the entire GTM and delivery pipeline for 3 years, securing $8,500+ in revenue across 15+ accounts by leading all cold outreach, phone calling, and organic lead generation from first contact to project sign off.
- Achieved a 98% satisfaction rate and maintained a 7% churn rate across 3 years by managing the full account lifecycle, ensuring recurring business that consistently outweighed customer loss.
- Built a custom Notion based CRM and project management system from scratch to track revenue, leads, and delivery timelines, replacing fragmented manual spreadsheets.
- Developed organic marketing strategies and video content that gained 50k+ views, driving significant new business without a paid marketing budget.
- Mentored a team of 5 interns, creating structured tutorials and automated workflows to get them productive quickly without pulling senior time away from delivery.

GRC Analyst - Thrive Learning, Nottingham, UK
September 2025 - September 2026 (1 Year Internship)

Key Achievements:

- Guided the business through a successful ISO 9001 Stage 1 audit by designing 6 end-to-end process flows for non-technical teams.
- Delivered a high-value prospect RFI by mapping security controls to client requirements, contributing directly to deal closure.
- Cut contract and DPA approval time by 70% by redesigning the company-wide DPA tracking process and building ContraAI, an internal AI-powered contract review platform, for procurement and legal teams.
- Led MDM migration to Kandji/Iru across 250+ endpoints with zero downtime, reducing IT support tickets by 40%.
- Identified the Shai-Hulud NPM supply chain threat and engineered a custom scan + remediation script deployed via Iru to secure the developer fleet immediately.

Projects & Tools

VenderScope - Continuous Vendor Risk Intelligence Platform
github.com/syed-hassan7/venderscope | venderscope.vercel.app

- Built out of frustration managing 50+ vendor audits manually in Vanta at Thrive Learning. Monitors vendor estates 24/7 across HIBP, NVD/NIST, Shodan, and Companies House, replacing annual reviews with a live weighted risk score (0–100).
- Used in real audit workflows alongside Vanta to surface breach history, active CVEs, exposed infrastructure, and compliance evidence across ISO 27001, SOC 2, GDPR, and Cyber Essentials.
- Generates one-click PDF audit reports structured for ISO 27001 Annex A and Cyber Essentials reviews, with a risk score drift timeline showing how a vendor's posture changes over time.

ContraAI - AI-Powered Contract Review Platform **(Internal Thrive Learning Tool)**

- Engineered an AI powered contract review engine using Next.js 15 and the Claude API to analyze complex legal documents against a configurable company playbook.
- Automates detection of high risk clauses and provides instant negotiation guidance for legal teams — the tool behind the 70% cut in contract/DPA approval time achieved during the DPA process redesign.
- Implemented a deterministic risk scoring system that tiers contracts from Acceptable to Critical based on playbook deviations rather than model variance.
- Built a full immutable audit trail for every sensitive action including clause reviews and user invites to meet strict internal GRC logging requirements.
- Developed a DPA specific intelligence module that detects subprocessor gaps and flags missing required clauses automatically.
- Designed a role based governance model (Viewer, Legal, Admin) to ensure sensitive contract data is only accessible to authorized personnel.

Education

Master of Science in Cyber Security

Nottingham Trent University, UK | January 2025 - December 2026 (Expected)

- **Dissertation**: Investigated whether diagrammatic techniques improve auditor comprehension of complex systems, combining case studies and interviews to demonstrate measurable improvements in understanding at small scale.
- **Relevant modules**: Network Security, Digital Forensics, Secure Software Development and Ethical Hacking.

Bachelor of Science in Software Engineering

Iqra National University, Pakistan | February 2020 - February 2024

- Graduated with **Distinction**.

Certifications

Google Professional Cyber Security Certificate (2024) / Coursera and Google

Introduction to Python (2023) / Sololearn

Introduction to SQL (2023) / Sololearn

SOC Analyst Learning Path (2024) / LetsDefend and HackTheBox

- Completed a hands-on SOC Analyst Learning Path through LetsDefend, focused on real-world threat detection, incident investigation, and response within a simulated Security Operations Center (SOC) environment.
- Analyzed and resolved real-world cyber attack scenarios, including Phishing, Malware detection, and Web Attacks.
